

## Stratecast Deliverables to Date and Research in Progress

### Analysis Services

Big Data and Analytics (BDA)

Business Communication Services (BCS)

Cloud Computing (CC)

Connected Home (CH)

Consumer Communication Services (CCS)

Cybersecurity

Mobility and Wireless (M&W)

Operations, Orchestration, Data Analytics & Monetization Global Competitive Strategies (OSSCS)

Secure Networking (SN)

Stratecast Perspectives & Insight for Executives (SPIE)

<https://twitter.com/stratecast>

<http://www.youtube.com/user/Stratecast>

### ***Key Stratecast Attributes:***

- Intimate interaction with senior, heavily industry experienced industry analysts
- Multi analyst collaboration ingrained in Stratecast's culture (IE: OSS/BSS analysts collaborate with convergence analysts and professional services analysts, etc)
- Industry thought leadership and executive think tank approaches to analysis
- ...and more

<b>List of archived BDA studies available upon request</b>	

<sup>1</sup> Each Marketscape deliverable will be delivered as a webinar to BDA GPS subscribers and published in the BDA portal. The team will assess areas of focus at time of publication. Topics will likely include barriers to adoption, including privacy, particularly the impact of the EU's GDPR; data preparation (ETL/ELT, data wrangling) and data catalog; prerequisites to data analysis—and consuming too much time/focus; the proliferation of analytical tools complicating corporate decision making; and the need for nearly failsafe network connectivity to support big data transactions. On the plus side: the emergence of an end-to-end BDA platform to reduce confusion and accelerate adoption.
